

THE 5 LEVELS OF AI

AND THE PROMPTS THAT GET YOU THERE.

Everybody says you should use AI. Nobody hands you the prompts that actually work. So here they are. **Two you can paste today. Three we build with you.**

- 01  CHATTING · THE ONE-LINE ASK
- 02  **WORKING TOGETHER** · THE 5-BLOCK PROMPT
- 03  BUILDING · THE BUILD BRIEF 
- 04  CHAINING · THE CHAIN MAP 
- 05  RUNNING A TEAM · THE TEAM SPEC 

START HERE

FIVE LEVELS, ONE AT A TIME

Each level answers one question: how much of the work happens while you're not watching?

Most AI guides hand you twenty apps. The app was never the hard part. The prompt was. This guide gives you both: the level, and the exact prompt that moves you up it. Find the level you're really on, not the one you wish you were on. Then look at the next one up.

THE FIVE LEVELS · AND WHAT'S IN THIS GUIDE

01 CHATTING

You ask, it answers. A better Google. → [The one-line ask](#)

PROMPT INSIDE

02 WORKING TOGETHER

You hand over real work. It does the first draft. → [The 5-block prompt](#)

PROMPT INSIDE

03 BUILDING · THE MONEY IS HERE

It makes you a small tool you could never have paid for. → [The build brief](#)

BUILD TO UNLOCK

04 CHAINING

A whole job runs across your systems, start to end. → [The chain map](#)

BUILD TO UNLOCK

05 RUNNING A TEAM

Helpers per job, plus a boss helper to run them. → [The team spec](#)

BUILD TO UNLOCK

WHY THE TOP THREE ARE LOCKED

Levels 1 and 2 are things you **paste**, so they're printed in full. Levels 3 to 5 aren't prompts you can paste; they're systems you **build**. The prompt is only half the job. The other half (the pick, the write-down, the wiring) is the part we do with you. Go one level at a time. People who jump from 1 to 4 land on a mess and a bill.

LEVEL 01

CHATTING

A better Google.

PROMPT UNLOCKED · PASTE IT TODAY

You open a chat box, type a question, get an answer. No more reading five websites to find one fact. Real time saved. Maybe half an hour a day for the one person using it. But it all lives in one head and one browser tab. Nothing got built.

THE PROMPT THAT GETS YOU HERE

THE ONE-LINE ASK

Ask, then add one line of "who for."

"Write a nice email telling a customer their part is late. Keep it warm, under 80 words, and don't promise a new date I can't hit."

The upgrade most people miss: a plain question gets a plain answer. Add who it's for and one rule, and the same free tool gets sharper immediately. That single habit is the whole of Level 1 done well.

WATCH OUT

Your people pasting customer info into free personal accounts is the most common danger at a small business right now, and the easiest to fix. **Almost every time we look, we find it.**

LEVEL 02 • THE BIG UNLOCK

WORKING TOGETHER

You hand over real work, with your files and your numbers.

PROMPT UNLOCKED • THE ONE WORTH KEEPING

On Level 1 you ask questions. On Level 2 you hand over jobs. The difference between a shrug and a finished draft is almost never the tool. It's how you brief it. This is that brief. Fill in five blocks and paste the whole thing.

COPY THIS • PASTE THE WHOLE THING IN

THE 5-BLOCK PROMPT

ROLE

Act as a [who, e.g. "seasoned bookkeeper," "blunt marketing consultant"].

CONTEXT

Here's what you need to know about my situation:
[my business, the customer, the problem, any history
a smart assistant would need to do this well]

TASK

I need you to [exactly what you want done, plainly].

CONSTRAINTS

- [rules, limits, must-haves]
- [anything to avoid] - Tone: [friendly / direct]

FORMAT

Give it to me as [a short email / a table / 3 options
/ a script I can read out loud].

THE ONE BLOCK EVERYONE SKIPS

If you fill in only one, make it **CONTEXT**. The AI can't see your business. Leave it blank and it fills the gap with a guess. Vague context in, vague answer out. When in doubt, over-explain; trimming is easy.

THE BLOCKS, FILLED IN

Same five blocks, a real situation: an upset regular customer.

THE PROMPT, FILLED IN

ROLE Act as a calm customer service manager who keeps clients without giving away the farm.

CONTEXT I run a small landscaping company. A 3-year client, ~\$400/mo, emailed upset that our crew missed his Friday visit. It was our scheduling error.

TASK Write a reply that owns it and keeps him, with a fair gesture I can afford.

CONSTRAINTS Warm not groveling • under 150 words • offer at most a one-time 15% credit.

FORMAT The email, ready to send, with a subject line.

THE FIVE BLOCKS, IN ONE LINE EACH

- **Role:** the hat it wears. Sets the whole temperament.
- **Context:** the facts it can't see. The block that decides everything.
- **Task:** exactly what you want, in plain words.
- **Constraints:** your guardrails. Limits, must-haves, tone.
- **Format:** what the finished thing looks like.

THE LIMIT OF LEVEL 2, AND WHY 3 IS THE JUMP

Level 2 hands you finished **thinking**, but the work still comes back to you. It writes the reply; you send it. Nothing moves through the rest of your business without a person carrying it. Removing that person is Level 3. And Level 3 isn't a prompt anymore.

BUILDING

It makes you the tool.

BUILD TO UNLOCK

A price calculator with your real rules in it. A job tracker. One screen pulling three spreadsheets into a single number. You used to have two choices: pay a programmer a lot, or do without. That's over. Describe the tool in plain words and you get one. Levels 1 and 2 make you faster. **Level 3 makes your business need you less.**

THE BUILD BRIEF

LOCKED

THE TOOL, IN ONE LINE

YOUR RULES, THE LOGIC ONLY YOU KNOW

INPUTS & OUTPUTS

GUARDRAILS AROUND MONEY & CUSTOMER INFO

 **The catch isn't the prompt. It's picking the right first tool.** Pick wrong and you burn a month on something nobody uses. A PDF can't make that pick. That's the call.

CHAINING

The whole job runs by itself.

BUILD TO UNLOCK

A customer fills out your form. The chain looks them up, writes a reply, drops it in your inbox ready to send, and saves them to your list. A bill lands; it gets read, checked against what you agreed to pay, and entered in your books. Anything odd comes to you. This is the first level that removes a **whole job**, not just makes a person faster at it.

THE CHAIN MAP

🔒 LOCKED

THE TRIGGER, WHAT KICKS IT OFF

THE STEPS, IN ORDER

THE HANDOFFS BETWEEN SYSTEMS

WHO GETS THE ODD ONE OUT

🔒 **You can't automate a job you've never written down.** Do it from a template and you lock in one person's version of it, at random, forever. Writing yours down right is the work, and where we start.

LEVEL 05

RUNNING A TEAM

One helper per job. One boss helper to run them.

BUILD TO UNLOCK

Level 4 chains steps. Level 5 builds helpers. You train one helper to be very good at one job (topic picker, writer, editor, image maker, poster), then a boss helper that calls them in order and checks each one worked. A whole social post becomes **one instruction**. Each helper is a part you keep and reuse.

THE TEAM SPEC

LOCKED

THE HELPERS, ONE JOB EACH

EACH HELPER'S SINGLE JOB

THE BOSS HELPER'S RUNNING ORDER

THE CHECKS BETWEEN STEPS

Everyone getting value here did Levels 3 and 4 first. If you're on Level 1, this isn't your next move. It's the move after the two you haven't made yet. We build it in that order, on purpose.

THE NEXT STEP

YOU'VE GOT 1 AND 2. LET'S UNLOCK 3, 4, 5.

The prompts in here are yours. Use them today. What a guide can't do is pick your first build, write your busiest job down so it can be automated, and wire it into the tools you already run. That part is different for every business. That part is us.

DO THESE THREE YOURSELF, TODAY

- **Pin the 5-block prompt** where you work, and use it on the next real task.
- **Find out where your customer info is going.** Ask your team which AI accounts they use.
- **Name the one job that eats your week.** Not the biggest. The one that keeps coming back.

WHAT THE 20-MINUTE CALL UNLOCKS

- **Your real level**, and the one thing holding you at it. Rarely what the owner guesses.
- **Your first build.** The one Level-3 tool worth making first, and the ones to skip.
- **What the next level is worth** to your business per month. A real number, not an average.

BUILD

We pick and make the tool, wire it in, and hand it over. No black boxes.

EMBED

We stay on and look after the AI side of your business, like we would a network.

TWENTY MINUTES. WE'LL SAVE YOU HOURS.

Tell us the one that keeps coming back. We'll tell you which level it belongs on, what to hand the AI, and what unlocking it is worth. Free, whether or not you hire us.
